REGISTRATIONS OF NEW MOTION VEHICLES Top three maker [16]

Car sales down as luxury boom eases

Motor vehicle sales suffered a setback in April, with imported luxury models leading the way down.

Registrations of the top five European cars had jumped by 108 per cent in March following the announcement of an extra 20 per cent sales tax to apply to high priced cars from May. However in April, registrations of these models fell by 30.4 per cent (610 cars) from the March level.

Registrations of all motor vehicles fell by 23.9 per cent in original terms between March and April 1990. After seasonal adjustment the decline was still a significant 6.2 per cent, but the trend series recorded the fifth monthly rise in succession — at 1.6 per cent. Total registrations in April were 15.6 per cent more than in April 1989 in seasonally adjusted terms.

New registrations for the top five makes of all motor vehicles fell 12,365 to 38,311 in April, a fall of 24.4 per cent from March. The top five makes all recorded a decrease. Ford recorded the biggest decrease, 4,231 registrations, followed by Toyota (3,360), Nissan (1,945), Mitsubishi (1,614) and Holden (1,215). The remaining makes recorded 2,523 fewer registrations in April than in March.

The top five makes of all motor vehicles shared 81 per cent of the market in April, their share having decreased monthly since December 1989, when they accounted for 84.4 per cent. In April, Ford claimed 22.4 per cent, Toyota 19.8 per cent, Holden 17.5 per cent, Mitsubishi 11.1 per cent and Nissan 10.1 per cent.

For further information, order the publication Motor Vehicle Registrations, Australia (9303.0), or contact Kevin Yeadon on (06) 252 6255.

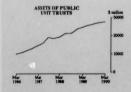

Public unit trusts continue to grow

Most types of public unit trusts have continued to attract investors despite strong competition for investment funds and some recent negative publicity. Unit trusts allow small investors to invest in the property, equity and mortgage markets.

As the graph shows, total assets of public unit trusts (excluding cash management trusts) have increased steadily since 1985. Over the year ended March 1990 assets increased by \$2,990 million or 12.1 per cent to reach \$27,603 million.

Property trusts are the largest asset holders among public unit trusts. In March quarter 1989 they had assets of \$15,524 million or 63.1 per cent of the assets of the public unit trust industry. By March quarter 1990 their assets had grown to \$17,771 million and their share of the industry had increased to 64.4 per cent.

International equity trusts and 'other trusts' have grown significantly over the past year. Domestic equity trust assets declined sharply in the March quarter. International equity trusts are now challenging domestic equity trusts as the second largest type of trust.

The public unit trust industry is currently undergoing a period of rationalisation resulting in a reduction in the number of trust managers. Many smaller trusts have ceased operating or have been acquired by larger management organisations.

PUBLIC UNIT TRUSTS, MARCH QUARTER 1990

Trust type	Number of trusts		Percenta in a		
		Total assets (\$m)	Previous quarter	rresponding quarter last year	Market share (%)

Road freight movement drops

Total interstate road freight moved by major operators during the March quarter 1990 was 18.9 per cent lower than the December quarter 1989 and 5.7 per cent lower than in the March quarter 1989.

The 2.04 million tonnes moved in the March quarter was the lowest recorded total since the June guarter 1985.

Decreases in freight originating and received were recorded for most major centres. While the March quarter tends to be a low quarter for freight movement, a number of respondents reported that industrial action during this period had further affected their activities.

INTERSTATE ROAD FREIGHT MOVEMENT, MARCH QUARTER 1990

	Road fro	eight originating	Road	freight received	
	Thousand tonnes	Percentage change on previous quarter	Thousand tonnes	Percentage change on previous quarter

Statistics Weekly 28 June 1990

Established house prices remain stable ...

Prices of established houses in the capital cities rose by 0.5 per cent in March quarter. This represents a slight increase on the 0.4 per cent rise last quarter, and a continuation of relatively stable prices for the third consecutive quarter.

ESTABLISHED HOUSE PRICES, MARCH QUARTER 1990
Percentage change

	From previous quarter	From corresponding quarter of previous year
Sydney	1.0	-1.6
Melbourne	-0.6	2.7
Brisbane	3.2	12.6
Adelaide	- 1.5	7.7
Perth	- 0.5	7.6
Hobart	0.2	6.7
Darwin	2.6	-1.7
Canberra	0.4	5.0
Weighted average of eight capital cities	0.5	2.8

... while growth in project home prices eases

Project home prices rose by 0.6 per cent in March quarter — the lowest quarterly rise since the series commenced in September quarter 1986.

All cities except Sydney and Canberra had lower increases than in the previous quarter. Perth prices fell for the third quarter in a row.

PROJECT HOME PRICES, MARCH QUARTER 1990 Percentage change

	From previous quarter	From corresponding quarter of previous year
Sydney	1.5	6.8
Melbourne	0.6	8.4
Brisbane	1.3	9.0
Adelaide	0.6	4.3
Perth	-2.3	1.9
Hobart	1.0	7.2
Darwin	5.5	22.3
Canberra	1.8	8.5
Weighted average of eight capital cities	0.6	6.9

For further information, order the publication House Price Indexes, Eight Capital Cities (6416.0), or contact Alison Robinson on (06) 252 5754.

Retired Australians rely on government pensions ... intentions shift to super

An estimated 2.6 million Australians have retired from full-time work with 1.6 million of these having retired at age 45 or more. Of the 1.6 million, over one million, or 63 per cent, say their main source of income is a government pension of some kind.

This was one of the main findings of the ABS survey of retirement and retirement intentions, covering people aged 45 and over, conducted in November 1989.

The survey found major differences between the main source of income for those who had retired at age 45 and over and the expected main source for the 1.5 million people intending to retire.

Only 9 per cent of those who had retired at age 45 and over reported superannuation and other retirement schemes as their main source of income. However, 30 per cent of those intending to retire expected super or other retirement schemes to be their main source of income.

Of those intending to retire, 30 per cent expected government pensions to be their main source of income.

MAIN SOURCE OF INCOME IN RETIREMENT FROM FULL-TIME WORK
PERSONS AGED 45 AND OVER
November 1989

	Retired at age	Intending to retire		
Source of income	Number '000	Per cent	Number '000	Per cent
Superannuation and other				
retirement schemes	147.5	9.1	471.6	29.8
Invalid, age, supporting parent's,				
widow's pension	812.6	50.5	469.7	29.6
War disability, repat, service,				
war widow's pension	202.4	12.6	11.2	0.7
Investments (interest, stocks, etc)	196.3	12.2	207.1	13.1
Savings, sale of assets	38.6	2.4	80.8	51
Part-time work	57.2	3.5	63.3	4.0
Somone else's income	123.6	7.7	116.4	4.0 7.4
Other	31.8	2.0	17.8	1.1
Did not know	_	_	146.5	9.2
Total	1,610.0	100.0	1,584.5	100.0

As the graph shows, males generally retire from full-time work at an older age than females. For females, 60 per cent retired from full-time work before the age of 45, compared with only 6 per cent of males. The highest proportion of males (60%) retired between the ages of 60 and 69.

For further information, order the publication Retirement and Retirement Intentions, Australia (6238.0), or contact Cheryl Trussler on (06) 252 6661.

Inquiries

The ABS supplies a wide range of statistical information:

- through its bookshops
- by mail order (including subscription)
- by facsimile
- electronically.

To order any of the publications that appear in Statistics Weekly or to inquire about the statistics and services available from the ABS, contact Information Services at any of the offices listed below. An Information Consultancy Service in each office provides assistance of a more extensive or complex nature.

(a) Based on seasonally adjusted figures where available. (b) Source: Reserve Bank of Australia. (c) For percentage changes, a minus sign indicates an increase in the deficit, no sign means a decrease in the deficit or an increase in the surplus. (d) The ratio of the price of goods and services for exports to that for imports. (e) Later figures released Wednesday, 27 June 1990. (l) Later figures released Thursday, 28 June 1990.

NOTES: † = change is shown in terms of percentage points.

n.a. = not available.

Figures have been taken from a variety of ABS publications. Copies may be obtained from Information Services (see page 6). Some of the figures shown are preliminary, some final, and some are revisions of previously published figures. Users should check the latest relevant publication or with the ABS information Services if the satus of the statist is important.

The ABS should be acknowledged as the source when reproducing or quoting any part of this publication.
